# Problem Space

Understanding the challenges faced by the passengers during a flight disruption.

# Existing solutions and limitations

## Quality of Service

Airline staffs are given training to give quality services to passengers.

## Lack of Awareness

Many passengers are unaware of their compensation rights.

## Compensation System

There are already existing monetary compensations for passengers.

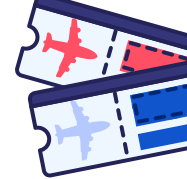

## Lack of Communication

Passengers only learn about these rights when facing delays or missed connections.

(Toolkit, 2023), (Legislative Services Branch, 2023)

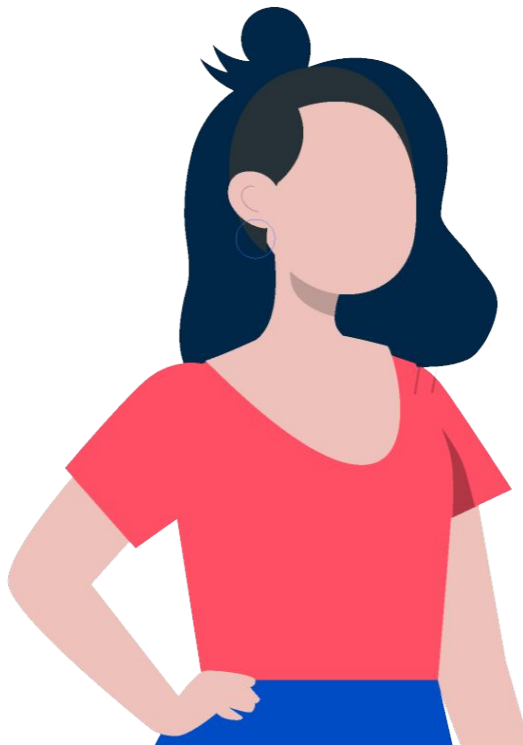

# Demographic Details

People who travelled  
alone in past 2 years

18-30 years old

Traveling in  
economy class

Flew internationally

Had at least one  
connecting flight

Booked tickets in  
one package

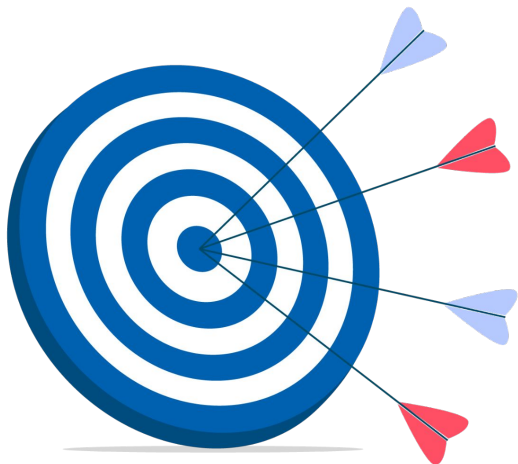

# Problem Statement

What are the factors contributing to the **communication gap** between the passengers' experiences and their expectations during a flight disruption?

# Objectives

- 1 **Identifying information barriers** for passengers and how clarity can be established.
- 2 **Analyze** how **past experiences** influence **passenger expectations**.
- 3 **Examining** the **airline policies** and **passenger rights** to enhance cooperation.
- 4 **Assess** if passengers' **experiences** differ from their **expectations** during **flight disruptions**.

Participants

# Findings

There is unclear communication from airline staff to passengers.

*"They can be honest to us, like, yeah, if the flight is going is gonna be delayed, so just straight away say that on our face."*

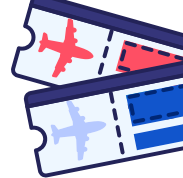

Reasons for delays are not communicated properly or accurately.

*"knowing nothing is more concerning than knowing the truth."*

# Key Insight

**Passengers** tend to **lose trust** in airlines due to **insufficient communication**, as airlines often **face limitations** in disclosing details about flight disruptions.

**Opportunity:** Rebuild trust by giving details of flight disruptions to passengers.

## Findings

Most Passengers said that they **were not informed** about the Airlines' policies and practices about flight disruption.

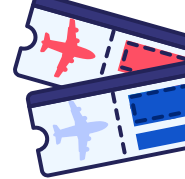

Passengers do not know anything about air passenger protection rights.

*"I would have expected a compensation but I assume that this was not contemplated in the law, in the regulations."*

## Key Insight

**Passengers** are **unaware of their rights** because there are **no proactive** measures to educate about passenger rights by airlines.

**Opportunity:** Create awareness about the air passenger rights.

# Findings

**21.9%** of the passengers read about Air Passenger Protection Rights and most of them found it on the **official airline webpage**.

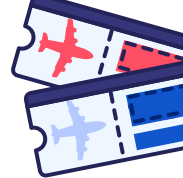

Passengers do not know anything about air passenger protection rights.

*"...It's like so much to read through, it's like reading a textbook. It would be better if important points were highlighted."*

# Key Insight

**Passengers struggle to find and understand** the rights and regulations document because it has **a lot of information**.

**Opportunity:** Make the rights and regulations document easier for passengers to understand.

## Findings

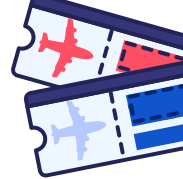

**56.1%** of the passengers were entitled to compensation; but only **29.2%** of passengers have asked for compensation during a disruption.

Passengers don't know when they will be eligible for compensation.

*"So it's like what needs to happen for me to have the right to get the compensation."*

## Key Insight

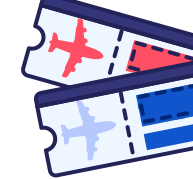

Passengers are **unsure** about their **eligibility for compensation** because it is difficult to understand and find this information.

**Opportunity:** Help passengers to understand when they are eligible and/or why they are not eligible.

# Experience Principles

I want transparency about flight disruption.

I want to know my rights and where I can find them.

I want the APPR document to be simple for me to understand.

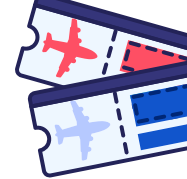

I want to know if I am eligible for compensation and how to receive it.

# How might we?

**Improve airline communication** to ensure passengers are well-informed about flight disruptions **despite the limitations** in disclosing details?

**Create awareness** about the air passenger protection rights (**APPR**)?

**Make** the **APPR** more **understandable** for passengers, despite containing a lot of information?

**Simplify the information** regarding **compensation eligibility**, and **make it more accessible** for passengers?

# Solution

# Project Inform-Me-Right

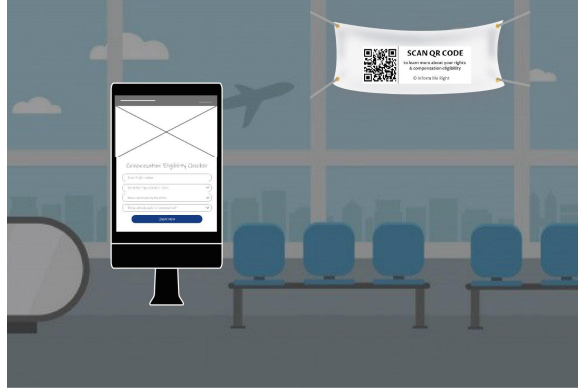

- 1 Create awareness about APPR.
- 2 Create a website which will have a compensation eligibility checker and a more accessible APPR.

# Awareness

1

The posters, digital ads regarding the Inform-Me-Right website will be displayed at the airport.

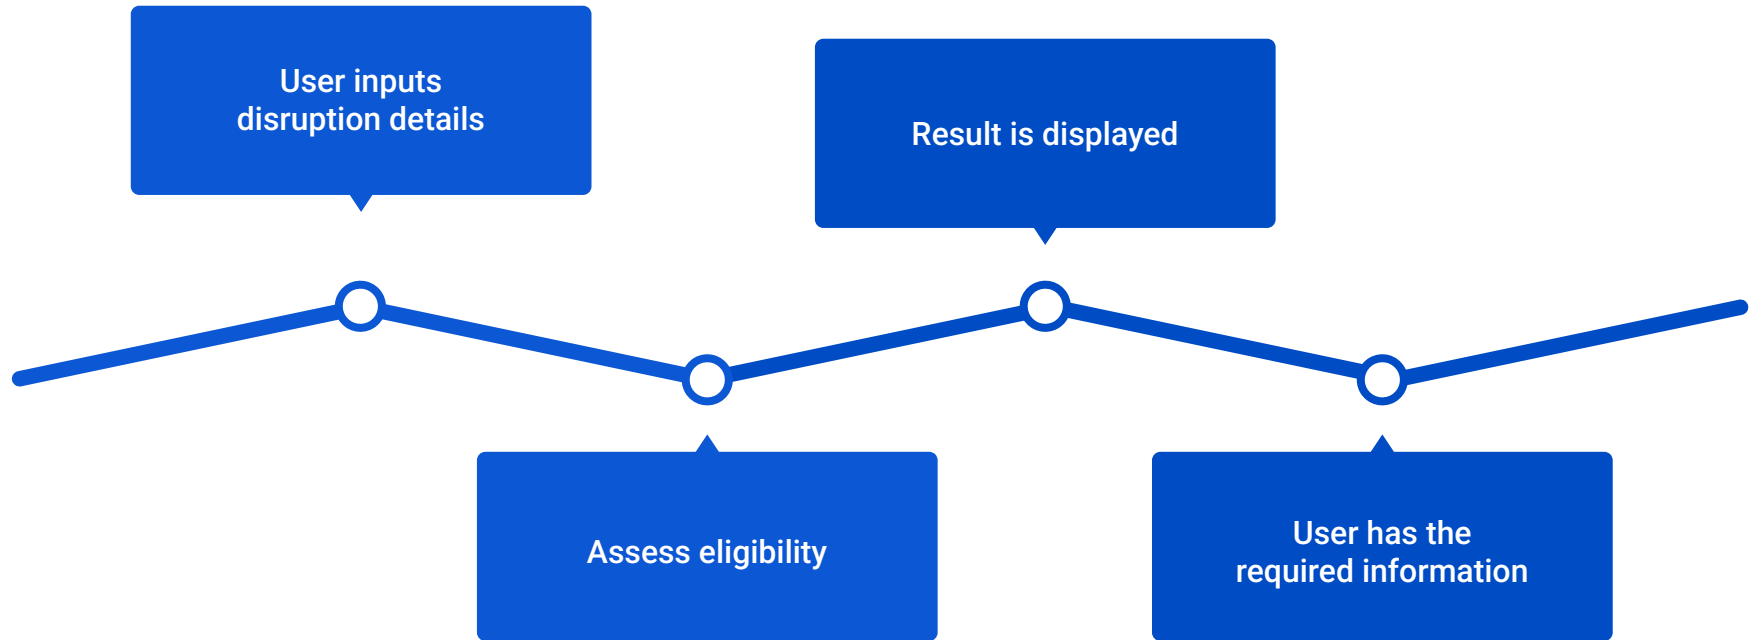

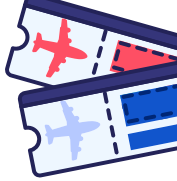

2

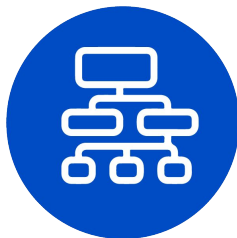

The brochures about the website will be included in the flight seat pockets, and the ads will be displayed on the in-flight entertainment systems.

# Website: Eligibility Checker

# Website: Simplified APPR

## Information Architecture (IA)

- Intuitive, clear navigation is key.
- Direct users to relevant pages with minimal clicks.

## Prioritise Information

- Use concise, plain language.
- Organize content into distinct sections for easy access.
- Keep sections short.

# What are the benefits?

## For the client

- Streamlined Communication
- Transparency & Satisfaction
- Awareness Materials

## For the users

- Accessible Rights Info
- Simplified Process
- Proactive Awareness

# High-Fidelity Prototype

[Inform Right](#)[Home](#)[Eligibility Checker](#)[Make a complaint](#)[APPR](#)

## Understand your Rights as a Passenger

The Air Passenger Protection Regulation (APPR) applies to **all** flights to, from, and within Canada. This includes connecting flights. If you experienced a problem, you must first contact your airline to resolve it. If that does not work, you can file a complaint with us. The CTA processes complaints and settles disputes between travelers and airlines.

[Compensation Eligibility](#)[Read the Full APPR](#)[Make a complaint](#)

### What is your situation?

Select the option that applies to you

- ☐ My flight was delayed or cancelled
- ☐ I missed my connecting flight
- ☐ I lost my baggage or my baggage was damaged
- ☐ I was denied boarding
- ☐ I want clear communication

[Enter](#)

[Inform Right](#)[Home](#)[Eligibility Checker](#)[Make a complaint](#)[APPR](#)

[Home](#) > [My flight was delayed](#)

## My flight was delayed or cancelled

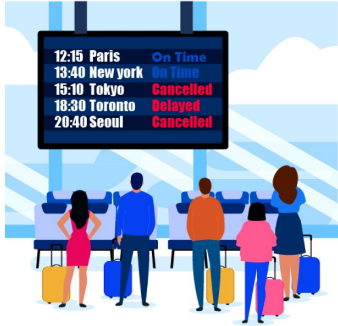

Jump to a topic

- ▶ Your Rights
- ▶ During a flight disruption
- ▶ Compensation
- ▶ Compensation level
- ▶ Information and Updates from Airlines
- ▶ Assistance
- ▶ Rebooking and refunds

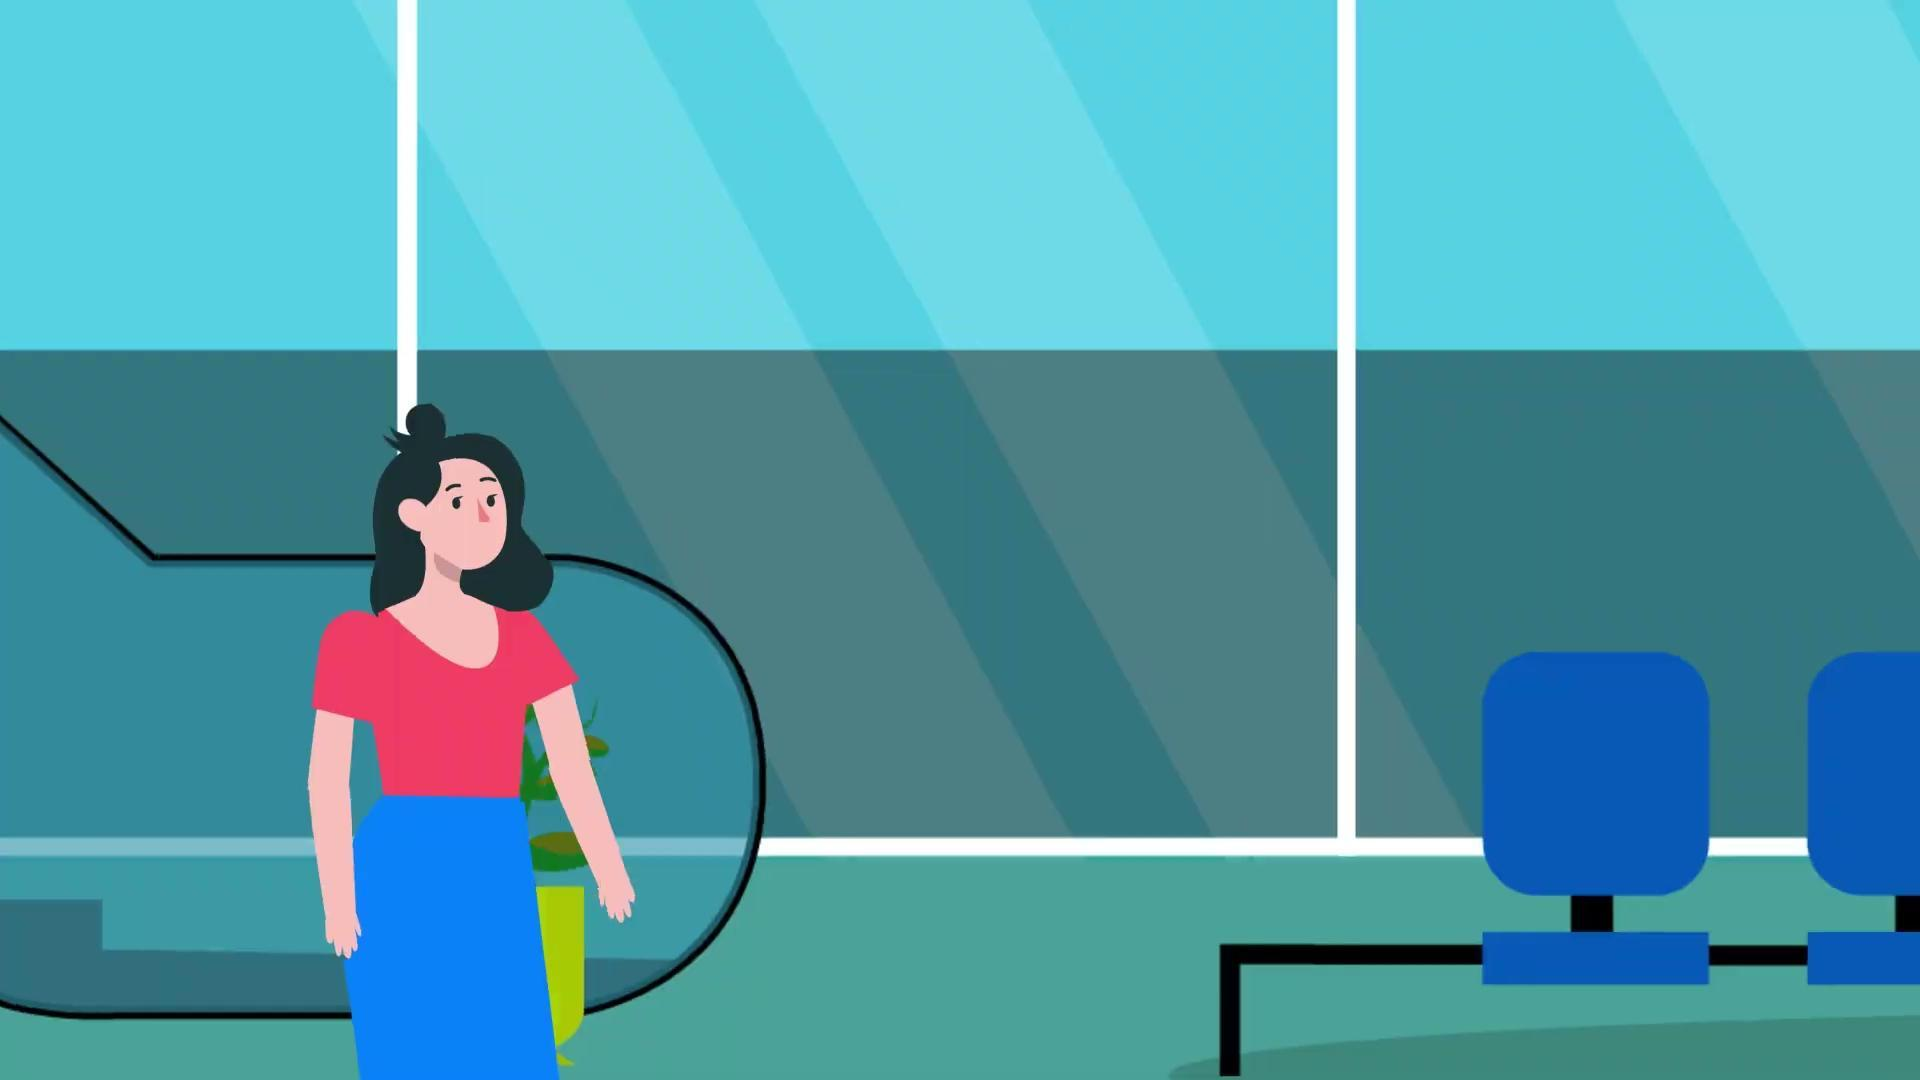

### Your Rights

Your entitlements when an airline delays or cancels a flight depend on the level of control the airline has over the situation. It can be:

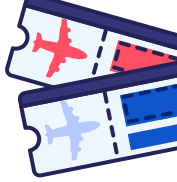

- ▶ Within the airline's control
- ▶ Within the airline's control but required for safety
- ▶ Outside the airline's control

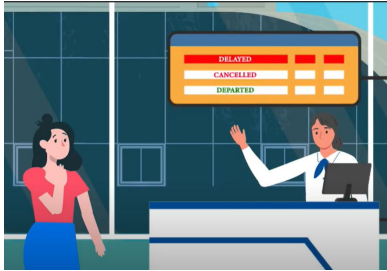

# Solution (Storyboard)

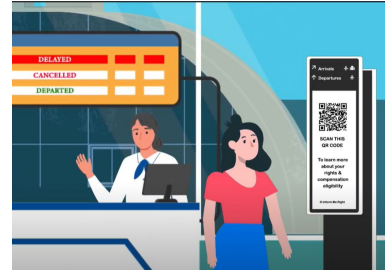

1

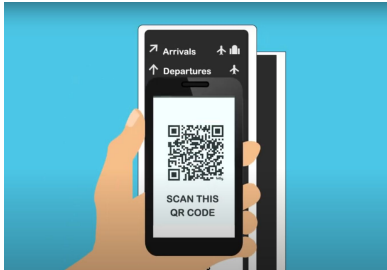

The passenger is informed that her flight has been delayed. She is stressed and not sure what to do next.

2

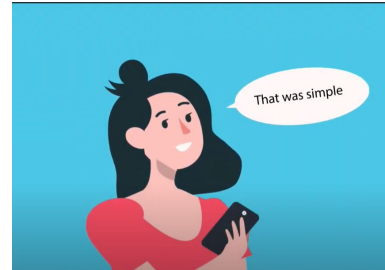

The passenger sees the ads and is curious about the website Inform-Me-Right.

3

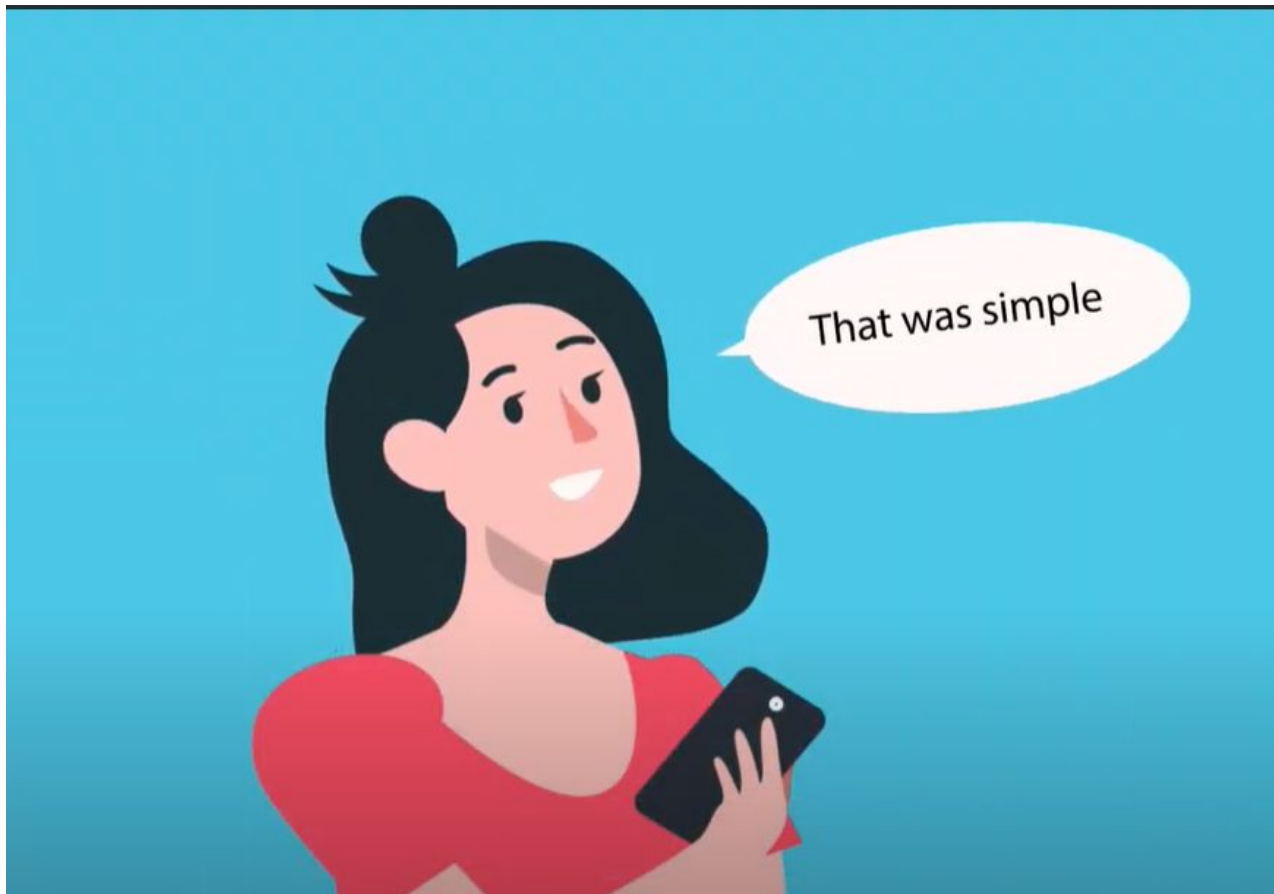

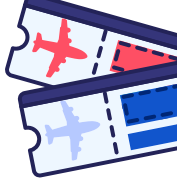

She scans the QR code and checks out the website. She finds all the information she needs.

4

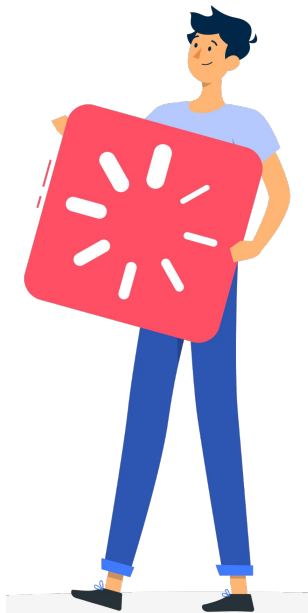

Now she knows her rights as a passenger and whether she is eligible for the compensation or not. She finds it easy.

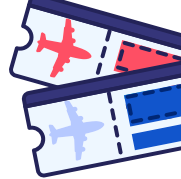

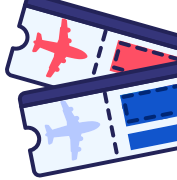

# Limitations

- 1** Delays in real-time flight data could affect compensation assessments.
- 2** Passengers might struggle to use the site in areas with poor internet connectivity.
- 3** The eligibility checker relies on accurate input from passengers.
- 4** Errors or omissions by passengers could lead to incorrect assessments.
- 5** The site may not cover all scenarios, requiring further clarification from airlines.

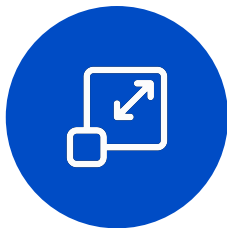

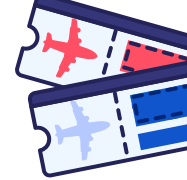

## Project Inform-Me-Right will:

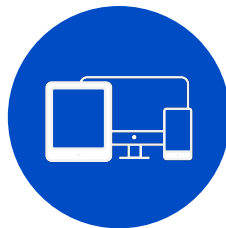

- 1 Create awareness about APPR.
- 2 Enhance communication and provide accurate information to passengers.
- 3 Simplify finding and understanding the APPR.
- 4 Clarify compensation eligibility.

# Scalability

Regional expansion with  
local adaptations.

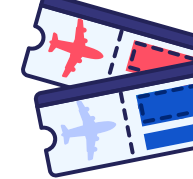

Partner with  
travel industry.

Integrate the website to  
different platforms.

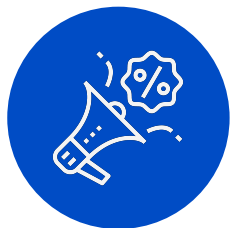

# Success Metrics

Track visitors, site duration, and compensation checks.

Gather user feedback on site usefulness and clarity.

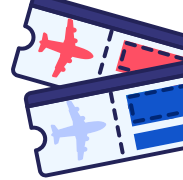

Measure distribution and visibility of promotional materials.

Monitor changes in compensation claims submitted.
